

Acura® manual

your expectations – our tradition

digital reading micropipettes

The new Acura® *manual* pipette line was built with the same attention that made the brand famous over several instrument generations.

Introducing a slick design with easy volume reading, it also features a number of innovations making high-performance pipetting safe and agreeable.

The Acura® line features:

- Digital display window for permanent volume visibility
- Exceptional, user-friendly ergonomics
- Lightweight
- Ultra-soft, effortless activation
- Innovative tip ejection concept
- *Swift-set* user calibration system
- Entirely autoclavable at 121°C

Acura[®] manual

your expectations – our tradition

► Most comfortable pipetting

Ergonomic shape, lightweight and ultra-soft plunger travel are key elements of the new Acura[®] family.

► Smart and reliable volume adjustment

State-of-the-art micrometric volume setting is performed smoothly and precisely by turning push button. Finely machined click-stops and free rotating cap prevent any unwanted volume alteration.

► Digital display always visible at a glance

Located on the front of the instrument, the display window allows set volume to be visible at all times during pipetting. A comforting reassurance for the user.

► Tip ejection – easier than ever

Most ergonomically positioned, the large surface, soft padded ejector button provides for low-pressure activation. In addition to ease of tip ejection, the shaft height adjustment system called Justip[™] – controlled by efficient click-stops – allows a wide selection of tips to tightly fit the nozzle.

Engineered ergonomic and design

The challenge for our engineers in combining high-tech material with ergonomic design was far above average, and they succeeded excellently. Whether in research or routine applications, the result is an instrument designed and built with the users in mind. The precision pipettes offer much more than superior performance. Enjoy exceptional convenience, comfort, safety and sturdiness, enjoy your Acura[®].

Acura[®] 815

Fixed volume – unlimited

The air displacement fixed volume pipettes come with all good features of the new instrument generation. These include slim ergonomic design, ultra-soft plunger stroke, autoclavability, and much more. Available in a wide selection of 1, 5 and 10 µL ultra-micro volumes, micro sizes from 20 to 1000 µL, and macro volumes models of 2 mL, 2.5 mL, 5 mL and 10 mL.

Workstation 337

Stable, sturdy universal pipette workstation 337 for 7 micropipettes of most brands. Available in four attractive colours.

Acura® 825/835

Adjustable volume micro and macropipettes

Equipped with a precision digital display, the new line is continuously adjustable down to a very fine volume resolution. Single-handed volume setting is easy when the other hand is busy. Measuring unknown volumes by aspiration is also possible with a high degree of accuracy. Click-stops, together with freely rotating *smartie* plunger button cap ensure setting stability while pipetting.

A total of 8 micropipettes covering the range from 0.1 to 1000 µL and 2 macropipettes ranging 0.5 - 5 mL and 1 - 10 mL are available.

► Swift-set calibration

The *swift-set* user calibration system - with integrated key and locking mechanism - makes tedious procedures a thing of the past. Easy and precise, it is in full compliance with international standards and recommendations.

► Colour coding at will

The Acura® pipettes have colour-coded display windows and *smarties* button caps suggesting a selection of suitable tips. Are other colour combination desirable for individual, lab or department identification? Then choose among 14 colours of *smarties*, or pick the *smartie* mix which contains all colours.

► Macropipettes - maxi advantages

The 835 models accommodate nozzle filters for added protection against liquid fill and contamination.

Optional adapter-nozzle allows fitting of Pasteur pipettes on 5 mL model, in addition to Polypropylene tips (order accessory separately).

► Minimum maintenance/sterilisation

Shock, heat, chemicals and UV light resistance is provided by carefully selected materials and good construction. Consequently, maintenance requirements are close to inexistant.

Thorough cleaning and sterilisation can be achieved by autoclaving the instrument fully assembled (121°C, 20 minutes).

Standards, quality control and warranty

The Acura[®] micropipettes are designed to perform in accordance with national and international standards such as EN ISO 8655, DIN 12650, GMP, GLP, NCCLS.

Performance values are obtained with bi-dist. water at constant temperature ($\pm 0.5^\circ\text{C}$) between 20 and 25 $^\circ\text{C}$, in accordance with EN ISO 8655/DIN 12650.

Each micropipette bears its own serial number and passes strict performance control attested by an individual QC certificate.

The instrument is guaranteed for a period of three years against any material or manufacturing defect.
